4000W Tower Retrofit

FLEX

Your Lighting Tower. Evolved.

When you look for huge amounts of light, you look to lighting towers. The 4K Flex takes your lighting tower to a new level, allowing you to retrofit your current outdated tower with high-quality glare-free 360° light. One kit effectively replaces up to four traditional lighting towers, covering extremely large areas with usable light, while reducing the eye fatigue of your crew.

Features:

- Weather & Wind-Resistant Up To 45 mph
- Designed For Longer Projects.
- Energy efficient and Eco-Friendly.
- Fan-Free "Pop Up" Envelope Design.
- Low-Maintenance & Cost-Effective.
- Great for year-round use. Works well in extreme heat and extreme cold.
- Flame-Retardant Fabric.
